

A step into our new
definition of space

ICF

A modular and freestanding space system

A versatile frame around the screen

ICF presents Quadro Freestanding, a brand new idea for meeting the challenges posed by the new way of working and creating a new perspective inspired by a completely unusual focus: the monitor and its surroundings.

Re-modulate the space

Quadro Freestanding is an adjustable base element that enables users to create and re-modulate the space to suit the variety of activities it needs to be capable of hosting.

A very simple inspiration

The frame, a basic unit which, by multiplying itself, creates a complex and multi-faceted image that is continuously changing. Starting from this concept, Quadro Freestanding presents itself as a simple monitor-base that is evolved, developed, and diversified to characterise all the surrounding space.

Display oriented

It's easy: all the elements can be assembled on wheels so they can be used to create a variety of furnishing solutions, even when used on their own.

A fluid interpretation of the office

Qadro Freestanding can be used starting simply with the monitor base, set alongside other single elements, or as a system, in such a way as to create an entire working area within a professional space. This way it can be used in a fluid, flexible way: the perfect solution for a constantly changing way of working.

Training

Meeting

Workshop

Flexibility of Qadro

See how the flexibility of Qadro Freestanding allows you to transform a single space into several different work areas: meeting rooms of various sizes, video conferencing spaces, training areas, multi-purpose recreational spaces.

Fine materials and exquisite finishes

Quadro Freestanding is not only characterised by a high level of practicality and a flexibility that is easy to achieve. Above all, it is a furnishing element of excellent quality, created with fine materials and exquisite finishes. The frame, shelves and stand of the containers are made of aluminium, available in different finishes, to which elements in fenix or crystal can be added, depending on the module to be created.

The Idea

The screen is the new linchpin of the office environment, because it is precisely around it that the new working rhythms flow: meetings, international calls, brainstorming sessions, educational initiatives, staff training, operational meetings, time-outs... And this is where Quadro Freestanding comes in.

Many variations

By simply enlarging the base to suit the requirements, the user can create a wall system, or a vase-holder partition that conveys a "green" effect, or incorporate a desk to obtain a space for tasks requiring concentration. Another alternative is to combine different elements to define an entire professional space that does not remain static, but can be continuously modified to cater for ever changing requirements.

Change the space

The traditional concept of work and the consolidated company structures have given way to much faster, more streamlined working methods, in which standardised roles are often replaced by agile and interchangeable work groups that collaborate on a certain project, but then reform to incorporate new skills in line with the tasks to be performed.
